Project Demo Planning

Date	01 July 2026
Team ID	xxxxx
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	1 Mark

Project Demo Planning:

A well-structured demo plan ensures that the team presents the project effectively, covering all key aspects in a clear and organized manner. This document outlines the plan for demonstrating the project, including the flow of the demo, key features to highlight, and responsibilities of each team member.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & Problem Statement	Overview of flood disaster impact and the need for a timely, accurate early-warning system	2	Gayatri Pothula
2	Dataset & Preprocessing	Walkthrough of the Kaggle flood dataset, data cleaning, and feature scaling steps	3	Rupa Venkata Naga Lakshmi Maddasani
3	Data Visualization & Analysis	Key insights from EDA including distribution plots, box plots, and correlation heat maps	2	Himareshma Neeli
4	Model Building & Evaluation	Comparison of Decision Tree, Random Forest, KNN, and XGBoost with accuracy scores	3	Savitri Mudula
5	Live Flask Application Demo	Entering sample rainfall/weather data and showing the real-time flood risk prediction result	4	Naga Shreya Chimakurthi
6	Conclusion & Future Scope	Summary of outcomes and the scalable deployment plan on IBM Cloud	2	Gayatri Pothula

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Brief context on flood disasters and the early-warning gap they leave behind
2	Solution Overview	High-level walkthrough of the ML pipeline (data → model → Flask app) and architecture
3	Live Feature Demonstration	Real-time flood risk prediction demoed using sample rainfall/weather inputs
4	Q&A Session	Open floor for questions from mentor/evaluators
