Initial Project Planning Template

Date	01 July 2026
Team ID	xxxxxx
Project Name	Rising Waters: A Machine Learning Approach to Flood Prediction
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create a product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members	Sprint Start Date	Sprint End Date (Planned)
Sprint-1	Data Collection & Setup	USN-1	As a developer, I can set up the Python/Anaconda environment and collect the flood prediction dataset containing rainfall, cloud visibility, and meteorological features from Kaggle.	2	High	Gayatri Pothula	28/06/2026	02/07/2026
Sprint-1	Data Preprocessing	USN-2	As a developer, I can clean the dataset by handling missing values, detecting outliers, encoding categorical values, and applying feature scaling.	2	High	Rupa Venkata Naga Lakshmi Maddasani	28/06/2026	02/07/2026
Sprint-1	Data Visualization & Analysis	USN-3	As a developer, I can perform univariate and multivariate analysis using distribution plots, box plots, and heat maps to understand feature patterns and correlations.	1	Medium	Himareshma Neeli	28/06/2026	01/07/2026
Sprint-2	Model Building	USN-4	As a developer, I can train and compare Decision Tree, Random Forest, K-Nearest Neighbors, and XGBoost models, and evaluate them using confusion matrix, classification report, and accuracy score.	3	High	Savitri Mudula	28/06/2026	02/07/2026
Sprint-2	Deployment	USN-5	As a user, I can enter rainfall and weather values on a Flask web application and instantly view the flood chance prediction result.	2	High	Naga Shreya Chimakurthi	28/06/2026	02/07/2026
